

Semantic Web BOF

May 2, 2007

ApacheCon EU 2007

Suggestion for tonight

- Determine the agenda
- Find someone to take notes (it's Aaron)
- Try to follow the agenda
- Abandon the agenda halfway through and have some heated debate
- Look at some more semweb stuff (and why it doesn't work)
- Give up and go drink beer

Backup suggestion

- Leo has a 100 slides on RDF usage and technology at Joost
 - And we could look at Joost's broken schemas, crappy java, and why most of our developers really hate this stuff
- Or we could talk about what to do with Apache TripleSoup (and Leo has more slides, but those are for Friday)
