

GroomManager

- [Responsibility](#)
- [Scenario](#)
- [Source](#)

Responsibility

- Watch [GroomServer](#) registration/ deregistration. Ephemeral.
- Register to Supervisor.
- Maintain (**local**) groom list. Persistent

Scenario

- When a groom registers, it
 - # check and move groom out of quarantined set if any
 - # cache groom server spec info.
- When detecting a [GroomServer](#) offline, it
 - # **quarantine** the offline groom
 - # trigger reschedule tasks event
