## Welcome to the Apache Tomcat Wiki

<https://tomcat.apache.org/res/images/tomcat.gif>

This is the Wiki for Apache Tomcat, a Servlet and Java Server Pages container developed under the Apache License. The main documentation for this product is at [tomcat.apache.org](http://tomcat.apache.org). Below is a list of some useful pages: we encourage everyone to contribute to these pages or start new ones as desired. But before you do, please check out the main documentation site as well as the [mailing lists](#) and the [\[http://tomcat.apache.org/lists.html\]](http://tomcat.apache.org/lists.html) (whose archives are searchable).

If you do decide to contribute, you will need to create a Wiki login name (click "Login" link at the top of the page, then "create one now") and then send an e-mail to the Tomcat developers' mailing list or [Tomcat users' mailing list](#), see [mailing lists](#) page for details, asking to be added to the [ContributorsGroup](#). Please remember to provide your Wiki name. (Do not send personal e-mails to committers. Ask on a mailing list, so that a public record of this remains in an archive.) Apologies for this extra step, but it's necessary to combat spam.
