

CLI FAQ

Q 1. I have a suggestion/correction to the documentation, how would this best be passed on to the developers?

A: Create a patch! (read <http://www.apache.org/dev/contributors.html#patches> <http://jakarta.apache.org/site/getinvolved.html>) Attach the patch to a bug report (<http://issues.apache.org/bugzilla>)

- Never direct email (please keep all discussions on list) except for security issues
- Dev email list? Yes (best to create an issue in bugzilla and then followup on list since the lists strip many attachments)
- User email list? Possibly
- somewhere in this Wiki (this can be good for some kinds of documentation which aren't really appropriate for the official documentation)
