Validator FAQ

A space for validator Frequently asked questions.

- [ValidatorXmlFile](#) - How to write a argument in the field element
- [ValidatorActionForms](#) - What's the difference between [DynaValidatorForm](#) and [DynaValidatorActionForm](#) ?
- [ValidatorDatesFormatting](#) - Date format - free-form text or dropdown/comboboxes ?
- [ValidatorBuilding](#) - How do I build Validator ?
- [ValidatorSetup](#) - steps for setting up Validator with struts
- [ValidatorDispatchAction](#) - How to use the validator with a Dispatch Action?
- [ValidatorJavaScriptTld](#) - Do I need to keep struts-validator.tld file under WEB-INF folder ?
- [ValidatorMinimumSteps](#) - Minimum steps to have built-in client-side validation working
- [ValidatorNoClassDefFound](#) - I get a No Class definition Found every second time !
- [ValidatorRegularExpressions](#) - [RegExp](#) questions
- [ValidatorRequiredRequiredIf](#) - required, requiredif don't work
- [ValidatorRequiredIf](#) - Usage of 'requiredif' validation?
- [ValidatorStandalone](#) - I would like to use it outside of Struts framework. Is it possible to do this?
- [ValidatorwithModules](#) - I have tried to use Validator with modules and it appears to load only rules and validation for one module - overwriting previously loaded rules and validation. Is this a bug or the way it is supposed to work?
