

# ChimeraCRM

An open source CRM built on .NET. The architecture allows it to be used as a marketplace where vendor and client both can synchronously use it as a CRM. Here the vendors can plug-in to the CRM software (ChimeraCRM) of the client and both the parties can work seamlessly. It allows all the steps required for a deal's life-cycle -

1. Tendering

2. Shortlisting Vendors
3. Finalizing Vendors
4. Issuing Purchase Order
5. Issuing Sales Order
6. Invoicing
7. Defect Tracking
8. Business Intelligence
