

GraduationChecklist

Graduation Checklist

The podling status page at [incubator.apache.org/projects/\\$PODLING.html](http://incubator.apache.org/projects/$PODLING.html) is the main graduation checklist. Possible additional items are collected here.

- The current source release artifacts must be released via the ASF mirroring system.
- Download pages must not point directly to the ASF servers; they must use the mirror CGI scripts.
- Old releases must not be left on the mirroring system; any download links must use the ASF archive server.
- The download pages must also include links to sigs and hashes and the KEYS file, all of which must be on the ASF servers (not via mirrors).
