# BoardReport-August2011

Apache Turbine Project Board Report, August 2011

## Status

The Turbine project has as usual seen low levels of activity in the last quarter.

The Turbine project has no board-level issues at this time.

## Project Branding Board Report Checklist

The last issue left is

- TODO: Logos and Graphics : include TM

## Community changes

No new committers were voted in since the last board report.

No new PMC members were voted in since the last board report.

## Turbine core project

The Turbine core project released version 4.0-M1 as a milestone release.

This milestone release is made for verification of the newly integrated Fulcrum services and to gather experience (and documentation) on how to migrate a 2.3.3 installation to the new architecture. It is not meant for production use. We hope to get lots of feedback from users to release a stable version of Turbine later this year.

## Fulcrum component project

Work on migrating the build process of the Fulcrum components to Maven 2 continues.

No beta or final releases were made since the last board report.

## META project

There has been no activity on the META sub-project in this quarter.

No beta or final releases were made since the last board report. The creation of Maven-2 archetypes has been discussed as an alternative to META.
