

BoardReport-February2014

Apache Turbine Project Board Report, February 2014

Apache Turbine is a servlet based framework that allows experienced Java developers to quickly build web applications. Turbine allows you to personalize the web sites and to use user logins to restrict access to parts of your application.

Turbine is a matured and well established framework that is used as the base of many other projects.

Status

The Turbine project has again seen low levels of activity in the last quarter.

The Turbine project has no board-level issues at this time.

Project Branding Board Report Checklist

The last issue left is

- TODO: Logos and Graphics : include TM

Community changes
