

BoardReport-February2017

Apache Turbine Project Board Report, February 2017

Apache Turbine is a servlet based framework that allows experienced Java developers to quickly build web applications. Turbine allows you to personalize the web sites and to use user logins to restrict access to parts of your application.

Turbine is a matured and well established framework that is used as the base of many other projects.

Status

The Turbine project has had a busy quarter by our measures.

The Turbine project has no board-level issues at this time.

Community changes

No new committers were voted in since the last board report.

The last change to the committer base was the addition of Georg Kallidis (2012/09/19).

No new PMC members were voted in since the last board report.

The last change to the PMC was the addition of Georg Kallidis (2013/09/30).
