

# BoardReport-November2008

## Apache Turbine Project Board Report, November 2008

### Status

The project continues on with its typical activity pattern, i.e. occasional bursts of development. Questions are occasionally raised on the mailing lists and answered reasonably promptly.

The Turbine project has no board-level issues at this time.

### Community changes

No new committers were voted in since the last board report.

No new PMC members were voted in since the last board report.

### Turbine core project

A vote on the 2.3.3 release is underway and scheduled to close on 14 November.

No beta or final releases were made since the last board report.

### Fulcrum component project

Work continues on migrating the build process to Maven 2.

A vote on the release of the fulcrum-parent component that provides the parent pom for Maven 2 builds of all other components is underway and scheduled to close on 17 November.

No beta or final releases were made since the last board report.

### META project

No beta or final releases were made since the last board report.
