BoardReportTemplate

Apache Turbine Board Report, Month Year

Description

- Apache Turbine is a servlet based framework that allows experienced Java developers to quickly build web applications. Turbine allows you to personalize the web sites and to use user logins to restrict access to parts of your application.

- Turbine is a matured and well established framework that is used as the base of many other projects.

Status / Issues

Chair to summarize Turbine-wide news + the current state of affairs. Can be broken into an extra section (e.g. infrastructure) if something significant occurred.

If no Board action is required, say: The Turbine project has no board-level issues at this time.

Activity
