

SiteNavigation

[SiteNavigation](#) is the central place to explore this wiki. [MoinMoin](#) supports these [MeatBall:IndexingScheme](#)*_*s:

- [RecentChanges](#)
- [TitleIndex](#)
- [WordIndex](#)
- [FindPage](#)
- [WantedPages](#)
- [OrphanedPages](#)
- [RandomPage](#)
- [PageSize](#)

At the bottom of each page, there are actions that allow to navigate to other pages related to the current page:

- [LikePages](#)
- [LocalSite_*Map](#)

Additionally, there are the [PageList](#), [FullSearch\('text'\)](#) and [TableOfContents](#) macros, which allow you to automatically generate indices for cohesive parts of a wiki.
