The one problem with being on a Wiki is the need for yet-another user profile. I have lost track of how many times I've done this.

One profile I am committed to maintaining is [this on Linked-In](#). Try there for something more-or-less professional.

For something with more geekiness, there is always [stackoverflow](#) or [something that demonstrates](#) I am yet to master (Java) library deployment and Test Driven Development. I think I might improve both of those here.
