

Archive

Pages that are no longer current design and development issues are moved under this page. An entry SHOULD be added to this page for each page in the archive that explains why it was archived. Any page MAY be moved out of the archive if there is interest in starting work in that area.

Not started

These pages are for ideas that - for whatever reason - never got started.

- [AJP.next](#)
- [AJP Client Library and Command Line Tool](#) (proposed GSoC project that was not selected)
- [Nested Filesystem](#)
- [TomcatGrid](#)

Completed

These pages were used to track one-off tasks that have been completed or where work has ceased.

- [Cookies](#)
- [Git migration](#)
- [Java 9 Status tracking](#)
- [WAR URLs](#)

No longer relevant

The topics of these pages have been over taken by events and are no longer relevant.

- [Managing Tomcat's Dependency on the Eclipse JDT Core Batch Compiler](#)
