

# SolR

## SolR

This page will be a jumping off point for SolR and Nutch. It will point to other pages which describe how Nutch interacts with SolR.

SolR is a full text search server using the Lucene Java libraries. In fact it is a sub project of Lucene to be found at <http://lucene.apache.org/solr/>

- [RunningNutchAndSolr](#)
- [SolR Wiki](#) (but they may not know about Nutch, of course)
- <http://www.lucidimagination.com/blog/2009/03/09/nutch-solr/>
- <http://groups.drupal.org/lucene-nutch-and-solr> - A forum for people who use Nutch and SolR together with Drupal - a PHP Content Management System
