### Introduction

The Apache Software Foundation is responsible for providing the content for the event, while the Producer is responsible for everything else. PMCs that wish to provide content for the event are encouraged to have a spokesperson step forward to shepherd that process.

The apacheCON team will shortly after apacheCON Austin, take contact to all PMCs asking for track ideas.

### Tracks

We are currently planning 3 days with 5 tracks == 15 tracks in total.

A track is 6 talks. It is of course possible to do tracks over multiple days as well as 1/2 tracks.

### Track ideas

This is the current ideas for tracks.

#### httpd

Track manager Austin: [RichBowen](#)

Ideas: Future of httpd (does old mean dusty?)

#### OFBiz

Track manager Austin: Pierre Smits, Sharan Foga

#### Traffic Server

Track manager Austin: Leif Hedstrom

#### OpenOffice

Track manager Austin: Kay Schenk, Andrea Pescetti

#### Key Signing

Track manager Austin: JFClere

#### Infra

Track manager Austin: Daniel Gruno

#### Cloud

Track manager Austin: Ross Gardler

Ideas: whats next, cloud is today old, what will be the next hot way of developing/distributing applications.

## Content management/munging

Track manager Austin: Nick Burch

## Apache in Science

Track manager Austin: Lewis John McGibbney, Chris Mattmann

## Healthcare

Track manager Austin: Pei Chen (cTakes) & Jay (Big Top/Red Hat)

## Incubator

?

## Presentation/Meetup Ideas

This area is for interested participants or parties to provisionally show interest with some concept indicative of the nature of content you would present or like to build community around at [ApacheCon](#).

NAME	PROJECT	CONCEPT	NOTES
Jim from Govan	Apache Tika	Translation of Glaswegian to English to improve understanding of medical diagnosis and injury treatment using Apache Tika	THIS IS AN EXAMPLE
PUT	YOUR	IDEA	HERE
