Apache Tomcat	httpd.conf	httpd.conf
Content tech	Content tech	Apache Geronimo / Apache DS
Apache Hadoop	Apache Lucene	Apache Lucene
Apache Tuscany / Apache Synapse	Apache Web Services	Apache Felix (OSGi)

Big Feather Birthday Bash

Plan to attend a huge party on Wednesday night, celebrating 10 years of the ASF. There will be cake! And beer! And food! And music!

BarCamp Apache

The Apache Hackathon will be open to all and part of the BarCamp on Monday and Tuesday. Those that just want to hack are welcome and will be given space. The BarCamp will extend into the evening to allow those with day jobs to be able to participate. We expect there will be an approximate two-hour break between the day and evening sessions.

Communities are encouraged to participate in the BarCamp, but be aware that this is a completely open un-conference. If a project community wants more dedicated time, then please either plan a MeetUp, a Get Together or a conference community event.

MeetUps

Continuing the wildly successful tradition of MeetUps from ApacheCon Europe, we will open each night of the conference for FREE community GetTogethers and MeetUps. Each of these will be focused on a specific community / technology and will be self-organized.
