

ServiceMixSoa

[ServiceMix](#) is the leading open source Enterprise Service Bus (ESB), built from the ground up to provide the foundation for Service Oriented Architecture (SOA). [ServiceMix](#) provides business integration capabilities using a complete [Java Business Integration](#) (JBI) container and a host of JBI components including those for orchestration, rules, scheduling, transformation, validation and JBI transports including those for email, file, FTP, HTTP, JMS, RSS, VFS, VM and many more. Fully integrated with [ActiveMQ](#), one of the fastest messaging brokers available today, [ServiceMix](#) provides enterprise class messaging and clustering capabilities.

This BOF will provide a brief overview of the SOA landscape as it relates to [ServiceMix](#), the first open source ESB based on the JBI standard.
