

# AntExternalTaskdefs

The intent of this page is to list and briefly describe third-party Ant taskdefs.

This page lists external resources for Apache Ant. This page is meant to complement <http://ant.apache.org/external.html>, and allows to self-announce your antlibs, tasks, or extensions with the Ant community without requiring an Ant committer to check in your patch to `xdocs/external.xml` (.html).

Note that **nothing listed here is directly supported by the Ant committers** (therefore *external* tools and tasks), and if you encounter any problems with them, please use the contact information.

URL	Description
<a href="http://svgsalamander.java.net">http://svgsalamander.java.net</a>	Convert SVG documents to PNG, JPG, and other image formats.
<a href="http://ebourg.github.com/flamingo-svg-transcoder">http://ebourg.github.com/flamingo-svg-transcoder</a>	Task to transform SVG images into Java2D icons with no external dependencies.
<a href="http://sourceforge.net/projects/jtaskdefs">http://sourceforge.net/projects/jtaskdefs</a>	Taskdefs for VC6, VC7, VB6 and others.
<a href="http://jtools.org/ant-classloadertask">http://jtools.org/ant-classloadertask</a>	External taskdefs for class loader handling.
<a href="http://www.dokutransdata.de/ant_latex">http://www.dokutransdata.de/ant_latex</a>	Simple task to use (PDF) <a href="#">LaTeX</a> , <a href="#">BibTeX</a> , <a href="#">Makeindex</a> and <a href="#">GlossTeX</a>
<a href="http://www.dokutransdata.de/ant_nsd2ltx">http://www.dokutransdata.de/ant_nsd2ltx</a>	Task to convert Nassi-Shneiderman-Diagrams (XML) to <a href="#">LaTeX</a>
<a href="http://robmayhew.com/antspell/antspelltask.html">http://robmayhew.com/antspell/antspelltask.html</a>	Task to spell check source code
<a href="http://www.buildmeister.com/clearantlib.php">http://www.buildmeister.com/clearantlib.php</a>	Tasks to integrate Ant with IBM Rational <a href="#">ClearCase</a>
<a href="http://java.net/projects/deployment">http://java.net/projects/deployment</a>	Sun-provided Ant Pack200 task (pack, unpack and repack with fileset support)
<a href="http://www.matthiasmann.de/content/view/20/26/">http://www.matthiasmann.de/content/view/20/26/</a>	Ant Pack200 task that accepts a fileset and allows inline repacking of jar files
<a href="http://ant4eclipse.sourceforge.net">http://ant4eclipse.sourceforge.net</a>	Tasks supporting Eclipse configuration files.
<a href="http://antforms.sourceforge.net">http://antforms.sourceforge.net</a>	Provides a Swing user interface to Ant for setting properties and calling targets
<a href="http://antmeat.sourceforge.net/">http://antmeat.sourceforge.net/</a>	An Ant Task for automating <a href="#">FreshMeat</a> announcements.
<a href="http://www.osjava.org/jardiff/">http://www.osjava.org/jardiff/</a>	An Ant Task for showing public API changes between two jar files.
<a href="http://antcount.sourceforge.net">http://antcount.sourceforge.net</a>	Filters that can be used to count data in files. This can be used to get fine grained statistics from log files for example.
<a href="http://tom.loria.fr">http://tom.loria.fr</a>	Ant tasks for the Tom pattern matching compiler, and the Gom data structure generator
<a href="http://junitpdfreport.sourceforge.net/">http://junitpdfreport.sourceforge.net/</a>	<i>JUnit PDF Report</i> : Your JUnit test report in PDF format.
<a href="http://antxtras.sourceforge.net/">http://antxtras.sourceforge.net/</a>	Loads of extensions (rules, flowcontrol, log4j) for Ant.
<a href="http://code.google.com/p/svntask/">http://code.google.com/p/svntask/</a>	svntask is a super simple solution for using svn (Subversion) from ant.
<a href="http://code.google.com/p/sardine/">http://code.google.com/p/sardine/</a>	SardineTask is a wrapper around Sardine for executing WebDAV actions from ant.
<a href="http://code.google.com/p/sweetened/">http://code.google.com/p/sweetened/</a>	Sweetened: Ant Tasks to improve your Java builds and Eclipse integration.
<a href="http://ebourg.github.com/jsign">http://ebourg.github.com/jsign</a>	Task for signing Windows executable files.
