

JavaScript

A loosely typed, object-oriented language formerly and officialy known as ECMAScript. [JavaScript](#) is often found embedded in [webpages](#) to enhance functionality. The majority of [web browsers](#) support [JavaScript](#), including [Internet Explorer](#), [Mozilla](#), [Konqueror](#), [Links](#) and [Opera](#) to name a few.

Note that [JavaScript](#) is not [Java](#), although the two may communicate with eath other via a [protocol](#) known as [LiveConnect](#).
