

# V1Beta

## V1 Beta Release

Apache Beehive is striving to produce a beta release of our V1 in March 2005.

### Goals/Non-goals

- Goals
  - public release available Mar 3/2005.
  - updated/additional documentation (relative to alpha), existing samples working (in particular the JPetStore)
  - provide a reference point for bug reporting/discussion
  - dogfoodable for app building
  - documentation on API stability – we'll maintain a wiki where known areas of API churn will be documented (see below)
- Non-goals
  - API stability
  - strong guarantee of backwards compat
  - usable for production
  - complete documentation / samples

### Known Areas of API Unstability

[TBD]
