

ApacheConEU2006-Hackathon

Collection of ideas, what we could do at the Hackathon:

- guided tour through Cocoon 2.2 (What's new?)
- guided tour through Cocoon 3.0 (How does it work?)
- discussion about splitting up cocoon-core into more modules
- releasing beta2 of trunk (hopefully beta1 had been released in the meantime)
- create a sample "best practices" application (database, forms, multichannel) based on trunk
