

ArjeCahn

Hello, I'm Arjé Cahn and I am the technical manager of <http://www.hippo.nl>.

My main concern is the development of Hippo CMS, our content management system which uses Cocoon as a publishing framework. I can say I'm damn proud of all the brilliant ideas my fellow workers put into the sites we build with Cocoon. I sincerely hope that we can donate more and more of our time and code to the Apache Cocoon project.

We've organized the [2005 Cocoon GetTogether](#) in Amsterdam.

This year, we're organizing the [2006 Cocoon GetTogether](#) again in Amsterdam; please come and join us for some Cocoon talk and beers!
