BillHumphries

I am a XML, XSLT developer, coming to Cocoon from the world of PHP, interested in Content Management Systems and the Semantic Web.

I maintain a http://www.whump.com/moreLikeThis/weblog on XML and other issues.

I write, as time and work allow, notes on Lenya sitemaps:

- LenyaGetPageWalkthrough
- LenyaCreatePageWalkthrough

I'm also trying to understand Flow and CocoonForms, as well as Sendmail.

My misadventures with getting sendmail components to accept content from pipelines are described in MailBodyViaPipeline.
