

CocoonDocsDrafts

We are starting to use this Wiki to work on drafts of new documents for the [Cocoon web site](#).

Feel free to contribute to the drafts listed below. The goal is to move them to the Cocoon CVS once we feel that they are "good enough", after converting them to the Cocoon xdocs format.

Also, if you feel that other existing Wiki pages are good candidates for inclusion in the "official" Cocoon docs you can list them below.

Significant contributions will of course be listed in the final documents, but for this to happen you need to sign your name in [UserPreferences](#) before making any changes.

Draft documents for the Cocoon web site

- [CocoonPrimer](#)
- [CocoonDocsPlan](#)
- [DocumentationTracksProject](#)
- [AboutTheBuildTargets](#)
- [ExploringTheLogs](#) could grow into a Cocoon How-To I think – [BertrandDelacretaz](#)
- [JavaDocs](#) could probably replace the nonexistent [<http://xml.apache.org/cocoon/userdocs/generators/php-generator.html>] – [TonyCollen](#)
- [FileGeneratorManPage](#) – experimenting with this new reference doc format – [BertrandDelacretaz](#)
- [CocoonFeatures](#) – try to come up with a list of all Cocoon features – [ReinhardPoetz](#)
- [PythonScriptGenerator](#) – A short ScriptGenerator how-to/example – [LaurentMauron](#)
- [ModuleSource](#)
- [XModuleSource](#)
- [PortalFramework](#)
- [PortalEngine](#) – FAQ / hints / code snippets for the Portal Engine – [JonEvans](#)
 - [PortalEngineBookmarks](#)
