(Michael) CUS meeting in Bern was a great pleasure. All persons that have been present are indicated with a +. Sylvain also brought a colleague of himself, so altogether we were 9 persons.

One interesting point this evening was to realize that more and more applications are build on cocoon. So the evolution from a publishing framework to a full featured EAI framework is going faster and faster 😊 Maybe it could be interesting to prepare a list of WHO is building enterprise integrated applications with cocoon.
