

# Crafterm

Hi There,

My name is Marcus Crafter, and I've been developing with Cocoon since February 2000. I'm originally from Mount Gambier, Australia, but am currently working in Frankfurt, Germany.

I was voted in as a Cocoon [committer](#) in September 2002 by [Sylvain Wallez](#), and am proud to be a member of the development team. You can find my committer introduction email [here](#).

I've worked on various parts of Cocoon, including:

- Cocoon Flow [debugger](#)
- Incorporation of Avalon Excalibur [Instrumentation](#)
- Axis based [SOAP server](#) for Cocoon
- plus others

I've also helped organise several Frankfurt Stammtisch events we've had in the past, and was also involved with the creation of the first Cocoon book (Cocoon: Building XML Applications) as a technical reviewer.

If you attended the Cocoon [GetTogether](#) in Ghent, you may have met me [there](#). 😊
