

DatatypesOfModularDatabaseActions

ModularDatabaseActions support the follwing data types to interact with Databases.

All supported Datatypes by group:

Group	Data Types	
boolean	boolean	
datetime	date, time, time-stamp	
large Objects	ascii, blob, binary, clob	
literal	string	
numeric	big-decimal, byte, double, float, int, long, short	
object	array, object, row	

List of Datatypes in alphabethical order

Type	Description	
array	an array	
ascii	an ASCII input stream, a CLOB input	
big-decimal	A java.math.BigDecimal value. a Big Integer	
binary	A binary input stream, a BLOB input	
blob	a BLOB input	
boolean	A boolean	
byte	A Byte	
clob	a CLOB input	
date	A Date	
double	A Double	
float	A Float	
int	A Integer	
long	A Long	
object	A Object	
row	A object	
short	A Short	
string	A String	
time	A Time	
time-stamp	A Timestamp	

Diferences with Original DB Actions:

Old Datatypes not supported:
now, image, image-width, image-height, image-size, image-mime-type

New defined Datatypes:
array, boolean, blob,clob, object, row
