

FOM%session

FOM: The Session Object

The session object is simply a wrapper around the Session object provided by the Cocoon environment. No methods were left out since they don't provide problems to the flow environment or suggest abuse.

---- methods ----

attributes

- **getAttribute(name)**
- **setAttribute(name,value)**
- **removeAttribute(name)**
- **getAttributeNames()**

control

- **invalidate()**
- **isNew()**
- **getId()**

time

- **getCreationTime()**
- * **getLastAccessedTime()***
- **setMaxInactiveInterval(interval)**
- **getMaxInactiveInterval()**

---- properties ----

[name] -> maps to the attribute indicates with the name

For example **session.blah** is equivalent to **session.getAttribute("blah")**
