

JCKermagoret

Hi, I'm **Jean-Christophe Kermagoret**.

I'm living in Nantes, France. Married, 35 old, 2 children.

I'd like to have functional components, written in different languages, I could plug with each other to get a ready to use web framework. I feel a REST-like world is the way to go, and this is why I like Cocoon and XML.

I'm working on Cocoon for 2 years now. I'm gradually discovering the benefits of sharing knowledge and wrote a few wikis :

- [DesignPattern Overview](#)
- [DesignPattern ECrud](#)
- [DesignPattern Filtering](#)
- [DesignPattern FormProcessing](#)
- [DesignPattern ListGeneration](#)
- [DesignPattern Locator](#)
- [Repository/DateTime](#)
- [Tips/JavalnXslt](#)

Currently, I'm working on **E-Crud design pattern** (a kind of) and **portals**.

My company, named **BlueXML**, provides xml-based services and develops an E-CRUD system in portal environment (ASL based), from which we want to start cms, intranet, crm, ... projects (all ASL based I hope).

I'm interested a lot in Daisy, Lenya and Hippo to understand clearly where they go, what can be reused, what has to be written to provide a real added value.

Come in <http://www.bluxml.org> for open source or <http://www.bluxml.com> for business.

You may mail me at jck <at> bluxml.org

Hope to see you wherever you want 😊
