## Mark Leicester

Hi there. I'm a New Zealand-born, London-based IT consultant and contractor specialising in the building of community-oriented web sites.

I'm a part time conductor/musical director. Probably as result of this I contributed the MIDI block to Cocoon. I took a MIDI to XMidi converter written by Peter Loeb and created an [XMidiGenerator](#), [XMidiSerializer](#) and also some stylesheets for MIDI manipulation (inversion and transposition). For more about this see the [MIDI](#) block page.

My corporate site is <http://www.efurbishment.com/> and my personal blog is at <http://www.ordinaryfool.com/>.
