

NitinRastogi

Hi,

I am a Cocoon user and have been using it to rendition the documents coming out of a big repository. In fact I am evaluating Cocoon so that it can be used as an alternative to many other licensed products.

My company Wipro Technologies would like to understand the usage and the interoperability of Cocoon. They would also like to use it for future projects.

Rest sometime later....

Have a nice day,

nitin.rastogi@wipro.com (**Rusty**)
