

OwenSmith

Name: Owen Smith

Residence: Redwood City, CA, USA

I am a newcomer to Cocoon. My use of Cocoon at the moment is distinctly "low-end"--I am using it to help me build and maintain a static website for a [friend of mine](#). I hope that Cocoon will also serve as a launching pad for researching other XML and web applications.

My interests currently lie in the realm of generative and domain-specific computer languages, music analysis and philosophy, and speculative fiction, insofar as my meager schedule permits.

I currently work as a software engineer at [PayPal](#) and moonlight as a church organist.

Developing Topics

These topics are topics I am currently developing for my own edification and reference. I hope that eventually, with the help of others, they will become well-formed enough to become real and useful Cocoon docs.
