

SebastienArbogast

My name is Sebastien Arbogast. I'm a French computer engineering student and I've come to play with Cocoon for my end-of-studies project, which I'm currently working on. I'm also looking for a job in Europe or in Quebec (where I've been working since September 2004), possibly related to Cocoon and/or Java/XML/Web development. If you want to know more about me and my projects, you can either contact me [sebastien.arbogast@gmail.com] or see my [WebCV](#) (which I haven't completely translated in English for now, but I'm working on it :-P). Feel free to come by... and have a nice day.
