

XSP

XML Server Pages, or Extensible Server Pages.

An abstraction layer that allows code to be generated from markup.

- **XSPFundamentals**: Basic architecture of XSP pages.
- **XSPSyntax** : A quick reference to the XSP elements
- **XSPDesignGuidelines**: Use [Logicsheets](#)
- There are a number of **BuiltInLogicsheets**
- **XSPCachingWithCocoonHEAD** – How to make XSPs cache when using Cocoon HEAD and version 2.1 and above - [MilesElam](#)
- **XSPActions** – How to write new Actions using XSP
- **XSPEnvironment** – Variables, helper classes, and default imports available in XSP
- 2.1 Documentation is missing? <http://cocoon.apache.org/2.1/userdocs/generators/serverpages-generator.html>
