Excalibur Quarterly Report for June 2007

Highlights:

- 1 new PMC member: Jorg Heymans
- 2 releases

Excalibur has been a little less sleepy this last quarter by adding a new PMC member and making two releases (one major release, one minor release). No new committers and no other major activity to speak of.

Most Excalibur activity is driven by Cocoon development which has me wondering if the Excalibur community is really strong enough to warrant a TLP. This is something I think the Excalibur developers need to address over the next quarter.

best regards,

J Aaron Farr on behalf of the Excalibur PMC
