

InfrastructureExplanation

Explaining Infrastructure

(Using Jakarta wiki to hold this for the moment)

Volunteers

(Add your name and area of interest/expertise. See the services page for areas to identify expertise in)

- Henri Yandell - generalist

Most useful pages

- [Intro to Infra](#)
- [Services](#)
- [Machines](#)
- [Network map](#)

List of Infra responsibilities

(things to add to the Services/Machines page)

Hardware administration
<other hardware? backup tapes, obscure shit>

Apache Httpd Servers
people.apache.org
<projects>.apache.org (including rsync scripts)

QMail Server
@apache.org

EZMLM Mailing list server
All ASF mailing lists

SVN repository
cvs2svn migrations
ssl httpd server

CVS repository
httpd server (viewcvs)

Bugzilla bug tracker
httpd server
<database?>

JIRA issue tracker
Tomcat
<how do we proxy port 80?>
