

# JakartaBoardReport-January2010

Jakarta status report for January 2010. There are no issues requiring board attention at this time.

## General

A majority vote to consolidate all the Jakarta subproject development mailing lists into one list has passed. Accordingly, we have requested Infra to help us merge the lists.

## Releases

- None this quarter

## Subproject news

### BCEL

BCEL saw a recent surge in development activity during which a number of bugs (10+) were fixed by Torsten Curdt. There has been a discussion about a v5.3 release and a call for testers on the developers list.

### BSF

2 JIRA issues relating to the website were fixed; otherwise no activity.

### Cactus

Quiet quarter, one new issue reported in JIRA.

### ECS

No activity - maintenance mode.

### JCS

Couple of issues fixed by Aaron Smuts. User mailing list sees a couple of posts a week, most answered by Aaron.

### JMeter

User mailing list is active as usual.

More progress has been made towards updating JMeter for Java 1.5, but no release as yet.

### ORO

No activity - maintenance mode.

### Regexp

1 issue has been reported & fixed.
