

# JakartaBoardReport-October2010

Jakarta status report, October 2010.

## General

After a couple of rounds of discussion, we decided to move two subprojects which were in maintenance mode i.e. no new development was planned, to the Apache Attic: Jakarta ECS and Jakarta ORO. We have asked the Attic PMC to take over and as a result, we will no longer include a status on these subprojects in future board reports. Most of the tasks associated with these Attic moves have been completed.

We elected one new committer this quarter, Milamber, based on his contributions to the Jakarta JMeter subproject.

## Releases

- None

## Subproject news

### BCEL

Couple of mailing list posts. Some code cleanup done by Mark Thomas this quarter.

### BSF

No notable activity this quarter.

### Cactus

Few posts to the mailing lists. Stefan Bodewig made some build changes to allow building via Gump.

### ECS

Moved to the Apache Attic in this quarter.

### JCS

Some user list posts but no development activity this quarter.

### JMeter

Mailing list activity continues as usual. Improvements and minor bug fixes to the code continue.

### ORO

Moved to the Apache Attic in this quarter.

### Regexp

No activity - maintenance mode.
