BordeauxMeetingWebConference

Status

6/7/2010 9:15AM (GMT)

Testing the system today, login instructions will be posted here sometime today.

6/7/2010 5.26PM (GMT)

Completed a working test - but we need some hardware on site. I'm attending from Thursday, will take it with me.

Instructions

The web conference will be accessible via a browser. However we have noticed some issues with Audio delay (approx 8 seconds of delay).

If you cannot cope with the audio delay - you can receive the audio feed via a sip client such as Ekiga.

To login to the web conference go to this url: http://188.121.62.56/bigbluebutton/conference-session/joinIn/85111

user: yourname pass: change-me-please

To access the audio stream separately to avoid the delay, use a sip client with these details:

server:
188.121.62.56

user:
34381

pass:
change-me-please

The number to dial on your sip phone:
85111
