

ProposalOpenOffice

Bits and Pieces about Lenya and OpenOffice.org

Both OpenOffice.org and lenya are XML based.

Perhaps set up the OpenOffice.org XML document as a Apache Lenya document type.

1. OpenOffice.org's DTD: <http://xml.openoffice.org/source/browse/xml/xmlloff/dtd/>.
2. OpenOffice.org's File specification: http://xml.openoffice.org/xml_specification.pdf
3. OpenOffice.org's XML FAQ: <http://xml.openoffice.org/faq.html>

There is an XSL already available to display OpenOffice.org as XHTML: <http://xml.openoffice.org/sx2ml/> (XSL-stylesheets OO --> HTML)

Have a look at import.xmap which has starting points.

Have a look at this old page: [WyonaOpenOffice](#)

OpenOffice integration in Apache Forrest

Apache Forrest already has support for OpenOffice.org documents.

OpenOffice integration in TYPO3 (GPL)
