

RoadmapLenya3.0

Main features implementation

JCR

- Who :
- Description :
- Status :
- Install :

Maven

- Who : Florent, Richard, Vik, Rainer
- Description :
 - Implement maven for Lenya
- Status :
 - Discussion : <http://marc.info/?t=127921247000002&r=1&w=2>
- Install :
 - see this work in progress page : [Lenya, maven and C2.2](#)

SOLR

- Who :
- Description :
- Status :
- Install :

Planning

1. Fix editor problem (some tasks are remaining)
2. Better documentation (specifically surrounding editor problems)
3. Release 2.1.0
4. Close tickets (over 200 open, some for years, looks very bad)
5. Design V3
6. Implement V3

Comments :

- At the meeting, there was strong consensus that v3 is going to be completely different. It will be built from the ground up on JCR and Cocoon probably won't be our primary engine. V3 will be built from the ground up to use maven and probably OSGi. The issues surrounding converting the existing project to maven won't be the same with a fresh project.
- I think we need to do 1 & 2 above quickly, which would result in 3. We should also be working towards 5, so we can do 6. It would be so nice to go to Apache Con in November with a design for v3 and to be able to encourage people to work on the project.
