Attribute Specification 2.0

Draft 1, 2015-03-24

This is the DeviceMap Attribute specification for devices, operating systems and browsers.

Overview

This document goes over the defined attributes for the device, operating system, and browser domains.

Device Attributes

- manufacturer
- model
- marketing_name
- release_year
- display_width - formally displayWidth, should we say the unit, pixel?
- display_height - formally displayHeight, should we say pixel?
- display_ppi - formally pixel_density_ppi
- cpu_model
- cpu_speed
- cpu_bits
- cpu_count - logical cpu units (cores) as seen by OS
- cpu_cache
- video_model
- video_speed
- video_memory
- device_memory
- device_storage
- device_camera
- is_phone - do we need this?
- is_touch
- is_tablet

TODO: what else?

Operating System Attributes

- manufacturer
- name
- version
- release_year

TODO: what else?

Browser Attributes

- manufacturer
- name
- version
- release_year

TODO: what else?
