

BoardReports May2012

Apache Rave is a widgets-based, web-and-social mashup platform.

ISSUES

There are no issues that require the board's attention.

RELEASES

Apache Rave 0.10.1 and 0.11 have been released since the last report.

ACTIVITY

The community has been focused on delivering simpler UI extension in 0.11. Additionally, discussions continue around improving the overall extensibility of the application and injecting additional architectural components. A current frequent topic of discussion is the need for a 1.0 release roadmap. The community will expand on these activities to work toward a viable & agreed upon roadmap.

COMMUNITY

The community has continued to be vibrant in the last month. We continue to see questions & contributions from new individuals & organizations.

COMMITTER/PMC CHANGES

No committer or PMC changes since the last report.

PRESS

A couple of articles related to graduation were published on smaller blogs

BRANDING

No issues at the moment. A full execution of the steps followed for the suitable name search will be performed prior to the July report. Additionally, multiple community members have an Apache Rave Google alert configured.

LEGAL

No issues.

INFRASTRUCTURE

We intend on requesting a new VM to host a demo version of the codebase prior to the next report.
