UpgradeShindig

1. Update the rave pom.xml to include the new shindig version number in the properties 2. Check-out the Shindig tag of the new version (this isn't absolutely required but it makes comparing some of the files easier) 3. Compare rave-providers/rave-opensocial-provider/rave-opensocial-server /rave-shindig/src/main/webapp/WEB-INF/classes/containers/default/container.js with Shindig file config/container.js and import any changes. 4. Compare rave-providers/rave-opensocial-provider/rave-opensocial-server/rave-shindig/src/main/resources/rave.shindig.properties with the Shindig file java/common/conf/shindig.properties and import any changes.
