

# XqueryEngineIntegrationFeature

## XQuery Engine Integration with XML Beans

This feature will enable the integration of an existing XQuery Engine with Xmlbeans.

### Existing XQuery Engines

saxon	MP L
qexo	GPL
Qizx /open	GPL

### XQuery Usage Examples

### Performance/Memory Footprint Concerns

Will it be possible to integrate XQuery engine in such way that it can interact directly with [XmlBeans](#) Infoset representation (store) and not require to serialize/deserialize [XmlBeans](#) to Infoset API supported by XQuery engine?
