

Apache Maven Continuum

Update:

List of classes still required as of 8th June 2006:

```
java/awt/AWTPermission
java/awt/Point
java/awt/geom/Point2D
```

I generated a list of required classes for Apache Continuum by running the continuum 1.0.2 release and accessing a number of functions through the web interface.

I then compared the resulting list of 439 JRE classes against those found in the jars generated by a build of Classlib r386322. 408 classes were found. The list of classes still required are:

```
java/awt/AWTPermission
java/awt/Point
java/awt/geom/Point2D
java/beans/BeanDescriptor
java/beans/BeanInfo
java/beans/EventSetDescriptor
java/beans/FeatureDescriptor
java/beans/IndexedPropertyDescriptor
java/beans/IntrospectionException
java/beans/Introspector
java/beans/MethodDescriptor
java/beans/PropertyChangeEvent
java/beans/PropertyChangeSupport
java/beans/PropertyDescriptor
java/beans/PropertyVetoException
java/beans/SimpleBeanInfo
java/rmi/NotBoundException
java/rmi/Remote
java/rmi/RemoteException
java/util/logging/ConsoleHandler
java/util/logging/ErrorHandler
java/util/logging/Formatter
java/util/logging/Handler
java/util/logging/Level
java/util/logging/LogManager
java/util/logging/LogRecord
java/util/logging/Logger
java/util/logging/LoggingPermission
java/util/logging/SimpleFormatter
java/util/logging/StreamHandler
javax/crypto/SecretKey
```
