Apache OJB

13th Dec: Harmony passses 100% tests on OJB 1.0.4.

Summary:

OJB version: 1.0.4

Platform\VM	RI	J9	DRLVM
RedHat Enterprise4	100%	100%	100%*
Windows xp2	100%	100%	100%*

*DRLVM sometimes will fail one testcase.

How to:

1. Build OJB 1.0.4
    a. "svn checkout http://svn.apache.org/repos/asf/db/ojb/tags/OJB_1_0_4" to checkout OJB 1.0.4
    b. Download required jars for jdo and put them in OJB_HOME/lib
    c. Run "ant" to build them.
2. Test OJB 1.0.4
    "ant junit-quick" to run testcases.

- "ant junit" will compile source code and run scripts to prepare test db, but it seems to exist a bug in that it produces an illegal SQL statement both on RI and Harmony which will lead to one testcase fail.
- There is another "perf-test" target will test performace.
