

DRLVM Documentation Quality Doxygen Warning Rating

[Back to Documentation TODO](#)

Documentation Rating Based on Doxygen Warnings

The [DRLVM_Documentation_Quality](#) page describes some rating of DRLVM code comments evaluation quality.

This is an additional rating that shows the amount of warnings during the Doxygen files generation

To obtain all warning the following Doxygen properties must be set:

```
WARN_IF_UNDOCUMENTED    = YES
EXTRACT_ALL              = NO
```

Rating itself could be obtained on Linux bash by the command:

```
cat DoxygenDrlvmLog.txt | grep Warning | awk -F ":" '{print $1}' > /tmp/r ; for f in `cat /tmp/r | sort | uniq`
; do ( echo `cat /tmp/r | grep $f | wc -l` " " $f ) ; done | sort -n -r
```

The current result is:

```
236 /vm/jitrino/src/codegenerator/ia32/Ia32InstCodeSelector.h
164 /vm/vmcore/src/kernel_classes/javasrc/org/apache/harmony/lang/reflect/parser/SignatureParser.java
